The **Access Fee** is divided evenly across the first three invoices of the Water Year (1 July to 30 June). The **Water Usage Above Access Fee Allowance Fee** is levied in the final invoice of the Water Year. The **Casual Users Access Fee** ensures that non-Delivery Entitlement holders also contribute to funding the cost of operating and maintaining WMI's infrastructure.

The **Asset Replacement Fund Contribution** will be divided equally over the four invoices issued for the Water Year, as will Buronga Delivery Entitlement holders' **Infrastructure Loan Repayment Fee** and Coomealla Delivery Entitlement holders' **Joint Venture Repayment Fee**.

The **Variable Government Charge** and the **Fixed Government Charge** pass through charges levied by the NSW Government. The Fixed Government Charge is divided over the four invoices issued for the Water Year.

The **Membership Levies Fee** covers WMI's membership fees payable to NSW Irrigators' Council and National Irrigators' Council.

The **Land and Water Management Plan Fee** funds implementation of the Land and Water Management Plan, including the Buronga Basin One Drainage Coordination Project. It will be divided equally over the four invoices issued for the Water Year.

Additional Water Fee – fee for service

Water Allocation is allocated to you based on your Water Entitlements (usually in proportion to the volume allocated by the NSW Government to WMI's water access licences) and you can buy more Water Allocation in the market if you wish. If, however, you order or take Additional Water in excess of the volume in your Water Allocation Account, you must pay this fee-for-service for each ML of Additional Water you order or take.
